

Manage and protect valuable mobile medical equipment with the ultimate location platform. 

CompleteAsset™ uniquely combines the most accurate *Real-Time Location System (RTLS)* utilizing bluetooth technology with full visibility in one platform. Just one infrastructure to install and manage – making it the world’s most practical asset visibility and management solution available today.

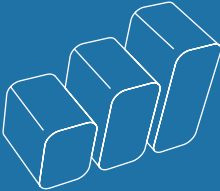

Real-time inventory and personnel location, status, reporting and analytics for your facility’s most valuable assets.

CompleteAsset™ provides your facility with:

Real-time asset tracking

Increased operational efficiency

Increased Working Capital

Easily Integrated SaaS Solution for all personnel

 **Reliability** - Ensures critical location, condition and status updates are delivered to the application level.

 **Integration** - Open platform for seamless integration. Over 100 clinical applications: Nurse Call, EMR, security and high acuity systems.

 **Installation** - Battery-powered devices are attached to equipment and gateways are installed in patient areas without the need to close rooms or interrupt patient care.

 **Track assets campus-wide across your enterprise.**

Digital Medical Tech has created a platform to allow health systems to proactively track medical devices and equipment.

Using Bluetooth technology, Digital Medical Tech's provides real time location system provides monitoring and management of a wide range of medical assets.

Nursing Tracking Pilot Results

Over the 90-day trial at Cedars-Sinai, Digital Medical only tracked a small portion of tagged equipment (200 pieces out of ~10,000), in a limited number of patient rooms (120 out of 1,000).
